Postdoctoral Position in Structural Biology

An NIH R01 funded postdoctoral position is currently available in the Lyon Lab (www.chem.purdue.edu/lyon/) in the Departments of Chemistry and Biological Sciences at Purdue University. We study G protein-regulated phospholipases in the cardiovascular system using a broad array of structural, functional, and cellular approaches, with emphasis on X-ray crystallography and cryo-electron microscopy. Candidates should have experience in molecular biology, protein biochemistry, cell-based assays, and/or structural biology. Please send a cover letter and CV with reference contacts to lyonam@purdue.edu. The cover letter should contain a brief description of how your previous training is relevant to the research goals of our lab and what additional training you hope to gain through this experience. All individuals, including minorities, women, individuals with disabilities, and protected veterans are encouraged to apply.
